How can we have faith that our votes are counted when there is no paper trail to recount? When the software is owned by a private company? Our current commissioner pushed for this unverifiable electronic voting system we now have - he says we don't need a paper trail in order to recount the votes.

60% of the county budget is spent on the Prison Industrial Complex. We need alternatives to putting our people in jail: access to quality education and health care, as well as meaningful, well-paid work, is a start. Reentry programs that address mental health are also needed.

We need a new perspective from our county government leadership in order to put our tax dollars to better use in serving the community.

Please consider voting outside the box!

Vote kat! - Green Party candidate for **County Commissioner Pct 2** (only challenger to the 24yr incumbent)
